EDUCATION

Msc. Telecommunications, Networks and Security - Saint Joseph University - 2017

My post-grad project was the development of a java application simulating the behavior of the Blockchain protocol in the IoT environment, in order to find an appropriate tradeoff between its complexity and security.

MSc. in Telecommunication Engineering - Antonine University - 2014

My post-grad project was the development of a road surveyor mobile application, based on Arduino and Android. By analyzing the retrieved data from accelerometers, potholes were detected and saved then users were notified to avoid them.

EXPERIENCE

FleetRunnr – Canada - 2021

Backend Engineer developing, testing and maintaining web apps. Creating restful services, Integrating 3rd party APIs, refactoring and reviewing code.

Jublo – UK - 2018-2021
